John Doe

SOFTWARE ENGINEER

666 999 0000 | xxx@my.centennialcollege.ca | Toronto, ON

PROFILE SUMMARY

A highly motivated Software Developer with a passion for solving complex problems and delivering impactful solutions. Excels at adapting to challenges by leveraging **strong analytical thinking, time management,** and **collaboration skills** to create value and achieve meaningful outcomes. A dedicated **team player** and **quick learner** with strong **problem-solving** abilities, **system design** knowledge, and experience in **software development** and **testing**. Possesses strengths in **data analytics, data visualization, modeling**, and **reporting**, with proficiency in **SQL, Python, Machine Learning,** and **Java.**

TECHNICAL SKILLS

- **Backend Development:** Java, Python, Node.js, C#, Flask
- **Frontend Development:** React.js, Redux, Angular, HTML, CSS, Bootstrap, JavaScript, Tkinter
- **Database Management:** MySQL, PostgreSQL, MongoDB, SQL
- **Machine Learning:** Pandas, NumPy, Scikit-learn, TensorFlow, Keras
- **System Development:** UML Diagrams, Object-Oriented Design, Agile Development
- **Tools:** Figma, Lucidchart, Visio, Visual Paradigm, Jira, Git, Visual Studio Code, IntelliJ IDEA, SharePoint, Spyder

WORK EXPERIENCE

Healthcare Systems R&A Inc. (May. 2025 - Present)
Role: Software Engineer Research Assistant (AI)

- Contributed to the development of **machine learning models** for chronic back pain and mineral exploration using **TensorFlow, Keras,** and **Neural Networks**.
- Assisted in automating the extraction of key points from images, converting them to JSON and then CSV for preprocessing.
- Worked with the team to optimize model architecture, improving accuracy and performance.

Kaanchy - E-Commerce Web Application (Mar.2023 - Oct.2024)
Role: UI developer, Inventory Manager, Customer Support

- Designed and developed an e-commerce **web application** for selling ethnic clothing.
- Implemented **inventory management** features to facilitate real-time stock updates and efficient order tracking.
- Managed **customer support** operations, delivering prompt and personalized responses to address customer needs, including effectively **handling challenging situations** and ensuring high satisfaction.

EDUCATION

Software Engineering Technology (Fast Track) - Artificial Intelligence (Co-op) - GPA: 4.45 / 4.5 (Sept. 2024-Present)
Centennial College, Toronto, ON *Expected Graduation: Dec. 2026*

Software Engineering Technology (Fast Track) - Advanced Diploma - GPA: 4.38 / 4.5 (Jan. 2019 - Aug. 2019)
Centennial College, Toronto, ON

Bachelor of Technology - Information Technology - GPA: 9.28 / 10 (Aug. 2012 - June. 2016)
Sri Manakula Vinayagar Engineering College (SMVEC), Puducherry, India

ACADEMIC PROJECTS

AI Project - Toronto Accident Prediction (Mar. 2025 - Apr. 2025**)**
Role: UI Designer, UI Developer, AI Developer

- Developed an **SVM** model and implemented **ensemble** techniques including **hard** and **soft voting** across five machine learning models.
- Handled preprocessing, feature engineering, and class imbalance.
- Designed and developed a **user interface** for model analytics and comparative visualization.
- Utilized tools and libraries such as **Scikit-learn, NumPy, Pandas, Seaborn,** and **Matplotlib.**

AI Project - YouTube Spam Classifier (Dec. 2024 - Dec. 2024**)**
Role: Project Coordinator, Developer

- Led the development of a **machine learning spam classifier** for YouTube comments, improving detection accuracy by 15%.
- Used **scikit-learn, NumPy, Seaborn, and Matplotlib** for data preprocessing, visualization, and model building.
- Wrote and optimized **Python** code to handle large **YouTube API** datasets and conducted cross-validation for accuracy and robustness.

BeatSnap - Social Media Web Application (Nov. 2024 - Dec. 2024)
Role: UI Designer, UI Developer

- Designed app wireframes in **Figma**, optimizing **user experience** and **navigation.**
- Developed frontend with **React, Redux**, and styled with **Bootstrap/CSS.**
- Overcame a challenging issue with iframe functionality, implementing a solution to control video playback, ensuring only one video played at a time.
- Integrated **YouTube**, **Spotify** and **application APIs** with the frontend to enable dynamic content and enhance user interactions.

MindTrack - Software System Design (Sep. 2024 - Dec. 2024)
Role: Project Coordinator, System Designer, System Analyst

- Led design and development of MindTrack, a **mobile app** to improve time management and productivity.
- Collaborated on defining **system requirements**, **software architecture**, and **Agile development.**
- Used **Lucidchart, Visio, Visual Paradigm,** and **Jira** for system design, documentation, and project management.

HONORS & AWARDS

Academic Excellence Merit Award in Information Technology (Jan.2016)
For Securing 1st Rank at the College | SMVEC | Puducherry, India

State-Level 2nd Rank Holder in Information Technology (June. 2016)
Pondicherry University | Puducherry, India

COURSE WORK

- Data Structures and Algorithms
- Machine Learning & AI
- Advanced Database Concepts
- Mobile App Development
- Web Development
- UI/UX Design
- Object Oriented Programming
- Linear Algebra and Statistics
- Leadership

PROFESSIONAL DEVELOPMENT

Unsupervised Learning, Recommenders, Reinforcement Learning May. 2025
Coursera (Remote) | Certificate

AI Product Foundations: Planning Strategies for Data Scientists Feb. 2025
LinkedIn (Remote) | Certificate

Supervised Machine Learning: Regression and Classification Jan. 2025
Coursera (Remote) | Certificate

Advanced Learning Algorithms Jan. 2025
Coursera (Remote) | Certificate
